

Praise God!!!....

I am **Tumaini Emmanuel**, a girl who is under the care of Manyoni Orphans Sponsorship Association (MOSA).

I registered at MOSA in 2008 when I was in standard seven at Manyoni Primary School. With the help of MOSA, I advanced to secondary for my ordinary level education at Manyoni Secondary School. Due to lack of teachers, the organization allowed me to transfer to Gospel Campaign Secondary School in Dar-Es-Salaam, the commercial city of Tanzania so I could have a chance to accomplish my dreams of becoming a medical doctor.

After a successful ordinary level (O-level) education, I proceeded to Kondoa Girls Secondary School for my Advanced level (A-level) secondary school. Today, I am at the Institute of Health and Allied Sciences in Mwanza Region taking Clinical Medicine. I credit my success to MOSA because I would not have achieved my dream if I did not have their support.

Medical books and computers along with other supplies necessary for day to day medical education are the most challenging issue for most students. Since the passion of becoming a doctor is still there, I am working hard with my limited means to achieve my dreams.

Thank you MOSA for your continued support, and I look forward to helping my community through my expertise when I graduate. May God bless you!
